

LEANDRO ROMANO ALONSO MILLICAY

FRONTEND & MOBILE SOFTWARE ENGINEER

Córdoba, Argentina | alonsoleandrowork@gmail.com | +54 3572 671602
linkedin.com/in/leandro-alonso-work | craftedbylean.com/es/profesional

Software Engineer with 4+ years of experience building web, mobile, and ecommerce products. Specialized in React, React Native, TypeScript, Shopify, and Node.js, with hands-on experience in production delivery, performance, security, real-time features, and app publication. Comfortable collaborating with QA, architecture, product, and business teams.

EXPERIENCE

Caramel Point | Mobile Software Engineer

May 2026 - Present

Client: Bancor (Banco de Córdoba) - Insurance vertical | Córdoba, Argentina (Hybrid)

- Develop and maintain mobile insurance experiences for Bancor, working across end-to-end user flows in a production banking environment.
- Collaborate with QA, software architects, and business stakeholders to turn requirements into secure, reliable, and high-performing solutions.
- Contribute within an Nx monorepo, with emphasis on code quality, maintainability, testing, and release readiness.

Infoexperto | Software Engineer - Frontend & Mobile

May 2024 - Apr 2026

Córdoba, Argentina

- Build and evolve web and mobile products for lead generation, commercial reporting, scoring, biometric identity validation, and internal operations using React, React Native, TypeScript, MUI, React Query, and Node.js.
- Delivered real-time messaging and content modules with WebSockets, PWA/Capacitor, and Firebase Cloud Messaging; managed Android and iOS release workflows.
- Built an automated job-search portal and improved the Validador Experto biometric flow, combining frontend product work with backend integrations.
- Refactored legacy code across multiple applications, improving readability, maintainability, performance, and team delivery.

Freelance | Software Engineer & Shopify Developer

Jan 2022 - Jan 2025

Remote | Argentina

- Design and build Shopify storefronts and focused ecommerce improvements, including custom themes and sections, product and cart experiences, performance optimization, and custom functionality.
- Delivered Fit Manage (React, Node.js, GraphQL, MongoDB), an Electron desktop system for agrochemical operations, and Arriero 2.0 (Node.js, PostgreSQL).
- Own projects end to end: discovery, UX decisions, implementation, deployment, analytics, and client handoff.
